About The Company

Saaragh is an IT services and staff augmentation solution provider. Founded in 2014, Saaragh is headquartered in Singapore with offices in India and partners in several countries.

We help businesses to accelerate their project delivery and solution development by offering experienced developers and consulting.

www.saaragh.com

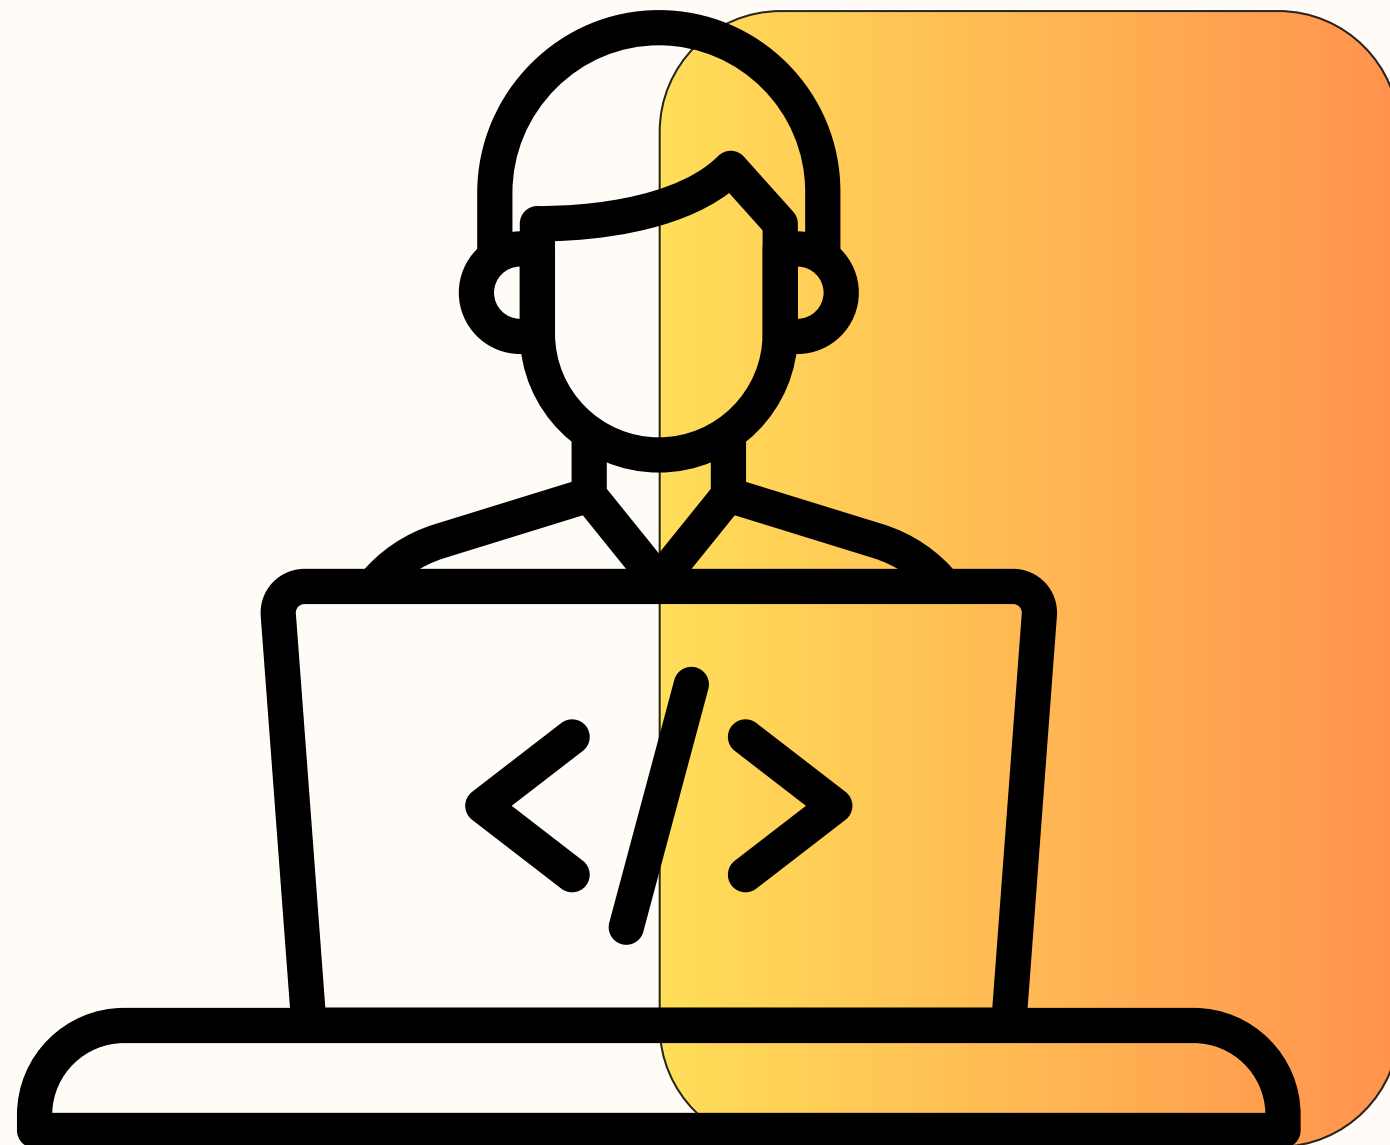

Customer

A MNC with 40000+ employees and customers from more than 150 countries worldwide, providing a wide range of digital transformation solutions.

Despite the huge number of employees, it is difficult for them to find available employees with an expertise in certain technologies whenever they get projects.

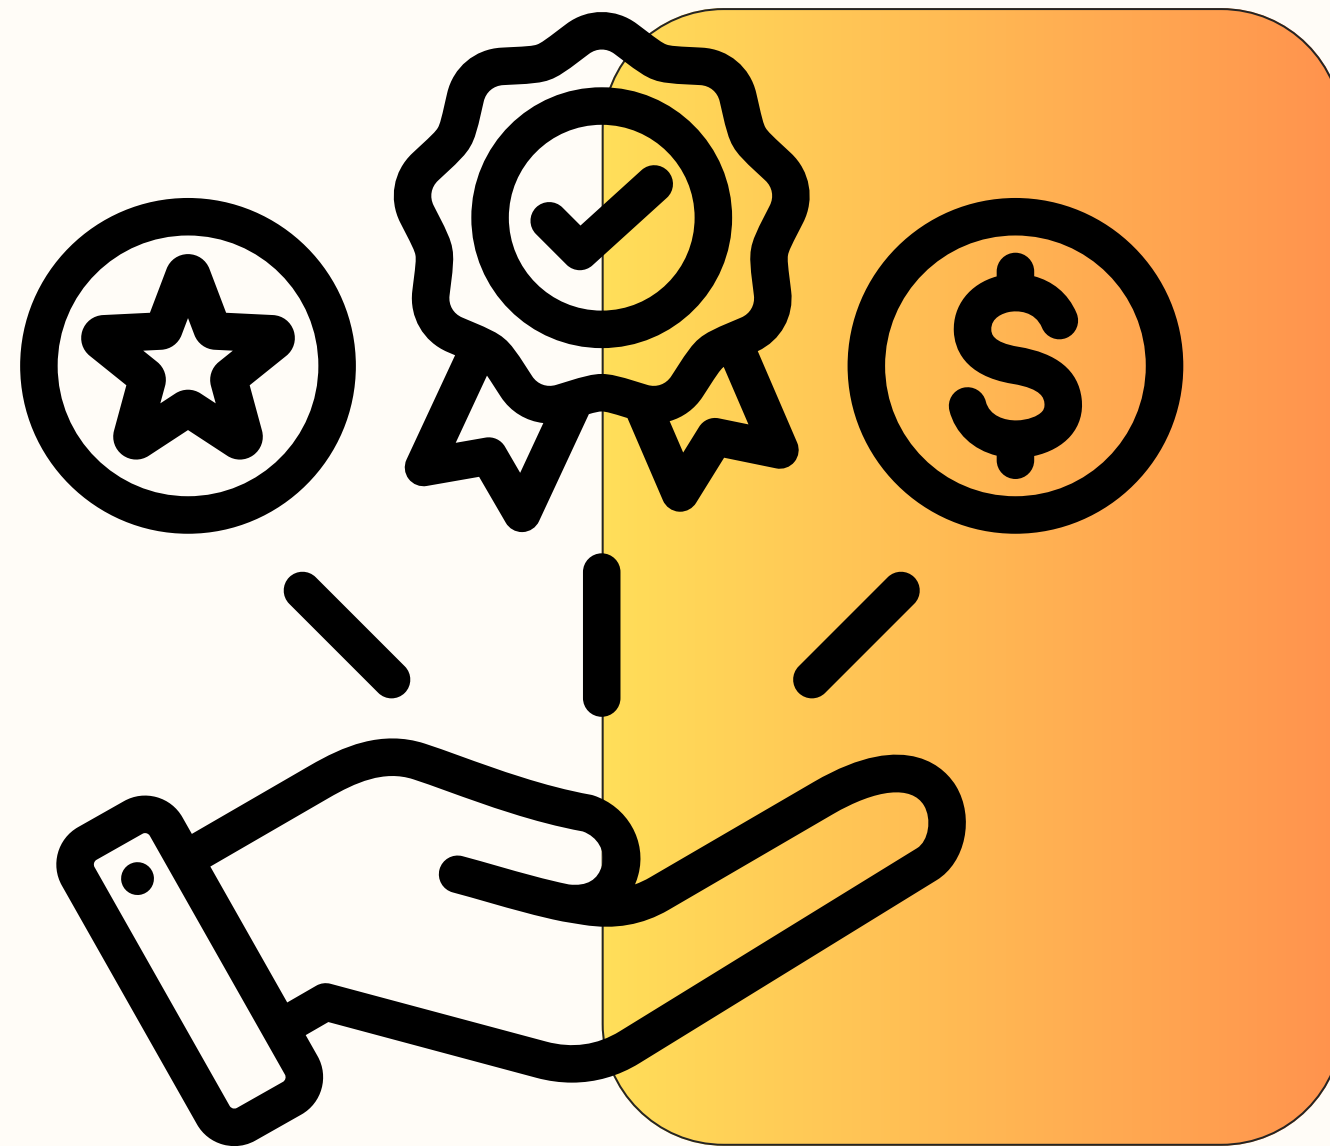

Saaragh helps them augment their staff with experienced developers for short term and long term projects.

Solution

Saaragh helps them with 5-10 experienced developers, designers, and project managers on a regular basis depending on the size of the project and the expertise required.

Usually, engagement for each project lasts for 5-8 months and the team moves to another project once completed.

Impact & Benefit

- Time to hire and train reduced from 8-10 weeks to 1-2 weeks = **75% - 90% faster hiring and subsequently, project delivery.**
- **Flexibility to hire more or less** depending on the need of the project.
- Being able to **hire experienced developers who are extremely difficult to find** and hire.
- The developers remain on Saaragh's payroll so the **customer does not have to worry about salaries, compliance, perks and benefits** and can reduce the team size at short notice - which they cannot if they hire on their payroll.
- Saaragh's **developers work as a part of the customer's team full time**, reporting from Saaragh is managed by a project manager and several other benefits.
